Professional Summary

Software Engineering student focused on Backend development. Practical experience with Java, JavaScript ecosystem (Node.js), and relational databases. Advanced Linux user (Arch Linux and Mint), building efficient applications. I stand out for my self-taught learning, discipline, and strong communication skills, developed through active participation in intensive study groups and a continuous role as an academic technology monitor.

Education

Software Engineering – Bachelor's Degree

Centro Universitário Filadélfia (UniFil) – Londrina, PR Feb. 2025 – Expected: Dec. 2028

High School

Colégio Estadual Polivalente de Londrina – Londrina, PR 2021 – 2023

Academic and Extracurricular Experience

Informatics Practice Center (NPI) Member | *UniFil* Jan. 2026 – Present

- Daily participation in a self-taught study group (20 hours/week) focused on practical deep dives into technology and programming.
- Developed strong discipline, self-management, and continuous learning, balancing rigorous goal tracking and attendance with academic monitoring activities.

Technology Monitor | *Projeto Londrinense Tech (UniFil)* Feb. 2025 – Present

- **Current Role (2026 - Present):** Mentoring elementary school classes with a focus on basic electronics and prototyping, providing practical support using Tinkercad and Arduino.
- **Previous Role (2025):** Technical and pedagogical support for elementary and high school classes in Java, Introduction to Databases, and Programming Logic (Portugol).
- Direct assistance to lead teachers in conducting classes and clarifying individual student questions.

Main Projects

Movies API | View on GitHub *Node.js, JavaScript, SQLite 3, Postman*

- Development of a complete RESTful API for managing movie lists.
- Structured the relational database and performed rigorous route testing using Postman.

Perguntalys Project | View on GitHub | View published game *HTML5, CSS, JavaScript*

- Educational web game focused on developing logical reasoning for children and teenagers.
- Collaborative development in an agile team, working on front-end programming and state management via local persistence (LocalStorage).

Technical Skills

- **Languages:** Java, JavaScript, SQL, HTML5, CSS3, Portugol, C/C++ (Arduino).
- **Backend & Tools:** Node.js, Postman, Git, GitHub.
- **Databases:** SQLite, Data Modeling (DDL, Normal Forms, Cardinality).
- **Infrastructure & Others:** Linux (Arch Linux and Mint), Tinkercad.

Languages

- **English:** Intermediate. **Portuguese:** Native.
